

- High Surge Energy
- High Voltage Withstand
- Non-Inductive
- Customizable Design

Safety is never an after thought with High Voltage / High Energy storage equipment. With their integral array of *HVR High Energy Disk Resistors*, our *HV Safety Groundsticks* offer a secure and reliable mean to discharge potentially lethal energy from HV equipment.

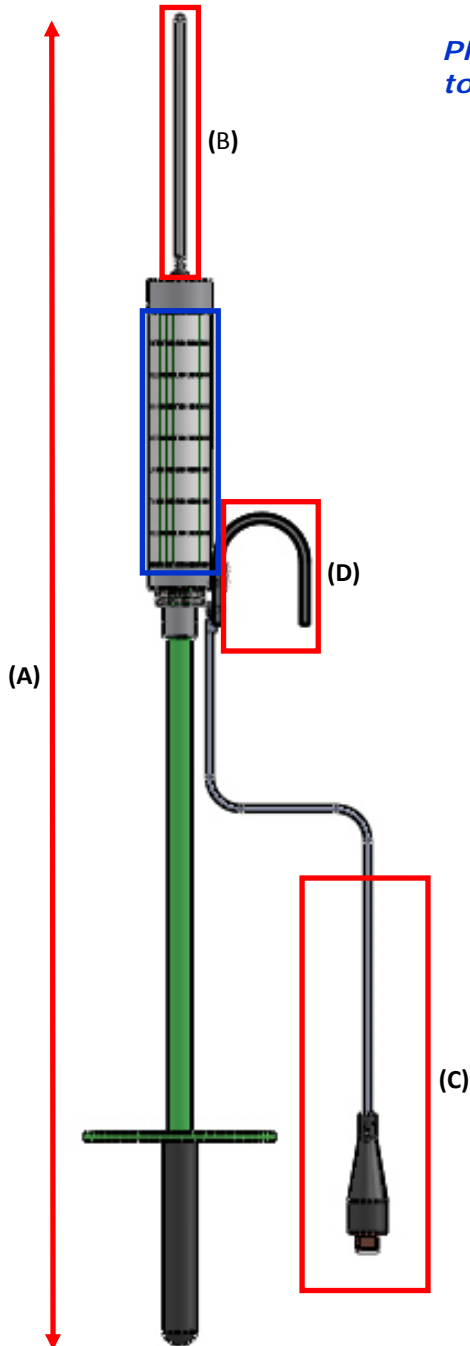

The *HV Safety Groundstick* is fully customized for your unique application, with voltage ratings exceeding 100kV and energy dissipation exceeding 100kJ.

Features

Ordering Information

Please provide the following information in order for us to design your Groundstick

Electrical Requirements:

- Total Energy to discharge
- Discharge frequency
- Peak Voltage
- Discharge Resistance
(typically to limit peak current to 50A)

Mechanical Requirements:

- Overall size envelope (A)
- Probe style (B)
- Ground wire requirements (C)
- Optional Hard Ground hook (D)

For non standard configurations, please contact HVR APC Engineering—engineering@hvrpc.com
